## Stick to the Pool, Says Henry Wise Wood

Leader of the Alberta Farmers is  
Confident of the Future of Wheat  
Pool

Declaring that the methods of the wheat pool are sound business and that the 60c initial payment on the 1930 crop was necessary if the credit of the organization was to be protected, Henry Wise Wood, president of the Alberta wheat pool, broadcasted a message to western farmers last week.

Mr. Wood, veteran leader of the farmers' movement in Alberta, delivered a radio talk from Calgary on Wednesday, September 3rd, in which he reviewed pool matters at some length.

A verbatim report of the radio talk is as follows:

I have been asked by your board of directors to communicate with the pool members explaining to them the present grain marketing situation and the reasons for an initial payment on pool wheat of only 60c per bushel, basis No. 1 northern.

In regard to the initial payment: The present low price of wheat, the general uncertainty of the market, and the vital necessity of protecting our credit by keeping our payments on a safe basis, are the reasons for payment of only 60 cents.

The pool has no liquid capital with which to make this payment. The money has to be borrowed and it takes millions of dollars—over hundreds of millions of dollars—to finance it. Nothing could be more fatal to the success of the pool than to break down our credit.

"While the protection of our credit is vital to the life of the pool, the percent of the full value of the wheat we get as an initial payment is not vital to the best interests of the grower. There may be some exceptions to this statement, but they are rare. I have been a farmer all my life. The money I knew I was going to get a little later on was just about as good as the money in hand—better, if the money in hand in any way compromised my credit. The most important thing to each grower is the aggregate amount registered by the final payment. All selling policy should be subservient to that end. While the initial payment should be substantial—and it always has been—it was never intended to approximate the full value of the wheat."

"A year ago we fixed the initial payment of wheat at \$1.00. This seemed more justified than any previous initial payment, but developments proved that the market, on which this payment was based was a fictitious one. This payment got the pool into trouble, but the fictitious market price got many of the wheat traders into even greater trouble, which, of course, doesn't help the pool any—it suggests only that we are liable to make mistakes and must watch our step."

"While 60 cents this year does not seem so well justified as \$1.00 did last year, we know there is no fictitious inflation this year, though the market is as hard as nails and sorely tried. When the initial payment was set at \$1.00 on July 1st last year, wheat was selling at \$1.44-1/2. Twenty days later it was \$1.72. Today the market closed at about half of what it was a year ago."

"I believe our present initial payment is safe, but I know nothing at this time to justify raising it. When the time comes that an interim payment and the raising of the initial payment are justified, it will be a pleasure to all concerned to do so. We hear many complaints that the grower cannot finance on 60c and he will be compelled to sell outside the pool. Of course I know, and your directors know, that the wheat growers cannot finance on 60c. This average crop at full present prices will not finance the grower for operating and living expenses, but there is no reason for believing that the Iowa pool member will not fare just as well in the present crisis as the non-pool grower."

"The pool had nothing to do with being about the present conditions in the wheat market, but there are good reasons for believing would be worse off if there had been no wheat pool. These conditions exist not only in the wheat market but in the marketing of other farm products, and

they also extend, in a lesser or greater degree, to the trade of the world. Coarse grains are just as bad, and I am informed that wool and sugar are even worse."

Under present false industrial construction, prosperity, especially to the masses, runs in waves, and between the waves are troughs or depressions. We are now in one of the regularly recurring depressions. Another wave will come eventually and we will rise to it—that is, all who do not sink from exhaustion in the meantime.

The wheat pool has been criticized for not selling what a year ago when prices were at their highest level. The answer is that the pool could sell only small quantities at those levels and took advantage of every opportunity to do so. In the meantime foreign millers were exceedingly bearish and buying very closely. European countries had considerable carryovers and the Argentine was making unexpectedly large shipments. It developed that the Argentine had an invincible carryover of some thirty million bushels of wheat that had not been taken into statistical account. This wheat was being shipped on consignment and was selling as low as thirty cents a bushel under Winnipeg prices.

Had the pool dumped its wheat against the Argentine consigned wheat two things would have been the inevitable result. First, we would have had to face the responsibility and the blame for breaking the Winnipeg market, from which blame we could never have freed ourselves. In the second place, by throwing our wheat on the market in competition with the large supplies of consigned wheat from the Argentine, we would have immediately broken the price very much further—easily to \$1 a bushel and possibly lower. The only possible course for the pool to take was to sit tight, just as it did. It was suggested at the time that we might eventually have to sell our wheat below the prices Argentine was getting, but there was nothing else we could do but sit tight."

We have been accused of having been responsible for the fictitious prices existing at that time on the Winnipeg market. There is no vestige of truth in this accusation, and every informed person who has made such a statement knows there is no truth in it. Hindsight is always better than foresight, but looking back over the whole situation I do know anything the pool could have done different from what it did."

"An unprecedented situation has arisen and the testing time has arrived. Not the testing time of the soundness of the pool system, but the testing time of the soundness and the nerve of the pool membership. A more crucial test would be difficult to imagine. The price of wheat is low—really below the cost of production. The growers need more money than they can hope to get for their wheat. Their creditors are pressing them. In some cases, undoubtedly. There is an idea among the growers that they need every dollar immediately that their wheat will bring."

"Enemies of the pool are taking advantage of these deplorable conditions and the consequent mental confusion to create suspicion and dissatisfaction and thereby induce members to desert the pool. To remind the members at this time this is being done against their own interests, would be to presume their ignorance. "On the other hand the pool system is just as sound as it ever was; it is just as much the only hope of the wheat grower as it ever was; the old system of selling is just as hopeless as it ever was. The pool itself is stronger and more influential than it ever was."

"The destiny of the pool is in the hands of the growers. I have an abiding faith in its future."

### B.C. HOOP STARS ARE CHAMPIONS OF FIRMAMENT

Prague, Czechoslovakia, Sept. 8.—The Canadian girls basketball team from Vancouver, B.C., won what was claimed as the world's championship by defeating the French team in the final today 18 to 14. The score at half time was 14 to 8.

## WEEKLY REVIEW PROV. MARKETS

Markets as Revised by the Market  
Examiner, of Calgary,  
For This Paper.

**BEEF**—Market at Edmonton has been on the dull order this week and prices are easier, particularly on steers and cows, which are off about 50c as compared with last week. Choice steers made from \$5.25 to \$5.50; choice light \$4.25 to \$5.50; good \$3.50 to \$5.25; medium \$4.25 to \$4.75; common \$3.50 to \$4.

**FEEDERS, STOCKERS**—A fairly active trade is noticeable in this market; the outlet is broad and prices are holding steady. Feeder steers are bringing from \$4 to \$5; stock steers \$3.50 to \$5; stock heifers from \$3.50 to \$5, and stock cows \$2.50 to \$3.75.

**HOGS**—Edmonton reports the market as slightly firmer, with bacon bringing \$10.55; select \$10.85 and butchers \$10, on a fed and watered basis.

**SHEEP**—Edmonton prices show no change from last week. Trading continues to be light. Yearlings bringing \$4 to \$5; ewes \$2 to \$4 and lambs making \$5 to \$6.50.

**CREAM**—A gradual decrease in offerings noticeable, according to reports from creameries. Receipts are holding up very well, however, considering the time of the year. Prices show no change from last week at special 25¢/27¢; first, 23¢/25¢; second 20¢/22¢.

**POULTRY**—Receipts light during past week. Demand purely local. Both chicken and fowl are being handled, and bulk of these are in good condition. Prices holding at steady level: No. 1 fowl, over 4 lbs., 10c under 4 lbs., 8c; roosters, 5c; broilers, 12c.

**EGGS**—No change registered in prices since last week. Receipts fair, and bulk of them show effects of long holding at country points and hot weather. Good quality finding ready outlet, but lower grades hard to move. Prices are: Extras, 23¢; first, 21¢; seconds, 16¢/17¢.

**HAY**—Receipts light this week due to harvesting operations. Demand not very active, but trade expected to improve towards end of month. Quality very good. Upland bringing \$12 and timothy \$17 per ton at country points.

**FEED OATS**—Market slightly easier, and quotation of 35¢ prevails. Receipts fair, composed chiefly of last year's crop. Fair demand.

**GREENFEED**—Odd loads arriving at market and are bringing 10 per cent.

**HIDES, WOOL**—No improvement in this market. Jobbers report country hides very hard to move. Tanners only making limited purchases and these are almost entirely confined to packer offerings. Prices steady.

**WOOL**—Situation unchanged from last week. Bulk of the clip in this province already marketed and only odd lots drifting in to jobbers now. Quotation of 7c to 8c.

### SALE AND REDEMPTION OF IMPOUNDED ANIMALS (Sec. 48)

Under the Domestic Animals Act, (Municipalities) that—

Notice is hereby given under Section 48 of The Domestic Animals Act (Municipalities) that—

1. Black Gelding, middle aged, about 1200 lbs., white star, also strip of white underneath, was impounded in the pound kept by R. Headon, located on the S.E. 32-45-7 with on Wednesday the 23rd day of July, A.D. 1930, and that said animal was sold on the 6 day of August, 1930 to Thos. Shaw, of Babym.

and that said animal may be redeemed by the owner or on his behalf within a period of thirty days from the publication of this notice in The Alberta Gazette, upon payment of all fees and costs due to the municipality and the purchaser of said animal.

R. J. TATE, Secy-Treas. of the Municipality of Battle River No. 423 Post Office-Irma, Alta.

### CARD OF THANKS

We wish to thank all for the many expressions of sympathy, for kindly help given and also for the many beautiful flowers in the time of our sad bereavement.

—Mrs. McDowell & Helen

## 17TH PARLIAMENT OPENED MONDAY

17TH PARLIAMENT  
SETTLES DOWN TO  
SOLVE UNEMPLOYMENT

Ottawa, Sept. 8.—Canada's 17th parliament disposed of preliminaries in short order early this afternoon. Within the space of three quarters of an hour members of the house of commons paid a visit to the senate chamber, received instructions to return and elect a speaker, selected for that important post Captain George Black, Conservative member for Yukon, and then adjourned to return for the formal opening at three o'clock. Led by Speaker Black, the members proceeded once more to the senate to hear the speech from the throne delivered by his excellency the governor-general.

Brevity characterized the speech from the throne which was delivered by his excellency the governor-general in opening parliament. The speech read as follows: "Honorable members of the senate: Members of the house of commons: It affords me great satisfaction to be associated with you in the important duties upon which you are about to enter at this the first session of the seventeenth parliament of Canada."

The necessity for dealing with exceptional economic conditions with the resultant unemployment has induced me to summon you at an earlier date than would be otherwise necessary. Measures will be submitted for your consideration, including amendments to the customs and the customs tariff which is anticipated will do much to meet the unusual conditions which now prevail. In inviting your careful consideration of the important matters which will engage your attention, I pray that divine providence may guide and bless your deliberations."

### KILLAM YOUTH IS KILLED INSTANTLY IN AUTO ACCIDENT

Young Anthony Kinzer, youngest son of Mr. and Mrs. Phillip Kinzer was killed instantly on Wednesday, September 3rd, about 5 o'clock p.m. Anthony was taking cream to the Sedgewick Creamery in a Ford light delivery truck when about a mile east of the Peterson crossing the car turned turtle and landed in the middle of the road, pinning Anthony underneath and killing him instantly.

The cause of the accident will remain a mystery as Anthony was alone and the only thing left to reveal the cause were the swerving tracks of the car, which evidently had gone into the ditch and then back onto the road again.

W. F. Ement, traveller for the Twin City Company was the first to discover the fatality. He was on his way from Sedgewick to Camrose and at once returned to Sedgewick where he informed Mr. McCracken of the Dorman-McCracken Garage, the latter telephoning at once to Constable J. C. Cottrell, Alberta Provincial Police at Hardisty. Constable Cottrell made haste to get to the scene of the fatality, bringing with him Dr. W. B. Murray, Coroner of Loughheed. The body of the unfortunate boy was ordered removed to Killam where a Coroner's inquest took place.

The damaged car was brought to Sedgewick by Richardson Brothers, and as it was possible to run the car by its own power, the accident could not have been due to faulty steering gear. The wind shield of the car and the fenders were badly damaged.

—Sedgewick Press.

### PLAN NEW TAX ON GASOLINE

According to advices received in Edmonton, the federal government proposes at the first sitting of parliament to impose an extra heavy duty on import gasoline. Everybody in the dominion will be jubilant over this except car and tractor owners.

When in Banff, stop at the Homestead Hotel and meet your Alberta friends. Ask to see the last edition of the Irma Times and get the latest news from home.

October 1st has been set aside by the provincial town and rural planning advisory board as "Penny Day". Societies interested are asked to take notice.

## CHURCH NOTICES AND ACTIVITIES

Sabbath Day Finds the Community  
Joining in Observance, Prayer,  
and Church Attendance.

**UNITED CHURCH NOTES**  
The services next Sunday will be at Strawberry Plains, Roseberry and town at the usual hours. The topic will be "The Set of the Soul." After next Sunday the hour of service in town will be at 7:30 p.m. Will our friends please note this change. We are planning to get all the mid-week activities going in full swing. Watch for further announcements.

**ANGELIC CHURCH SERVICE**  
Next Service will be held on Sunday, September 21st in Irma United Church at 3 p.m. All W. A. members are especially invited to attend this service for corporate communion.

Next W. A. meeting will be held on Tuesday, September 23rd at the home of Mrs. P. Yeend at 2:30 p.m. Every lady welcome.

The W. A. are holding a Whist Drive in the lodge room, on Thursday, October 9th. Prizes given. Adults 50c.

**ST THERESA CATHOLIC CHURCH**  
IRMA, ALBERTA  
Service on the first Sunday of each month at 11 a.m.

## Kiefer's Theatre Irma, Wednesday September 17th

ADULTS 45c — 8:30 P.M.

"The Cocoanuts" is a riot of slap stick; a talkie-singing which will keep you in uproarious laughter throughout the screening of this production. It's terribly difficult to explain a Marx Brothers' show. Groucho puns his way to glory and Harpo looks his dumb way and plays his part to great applause, while Chico gives us his Italian dialect and tickles the ivories in a piano solo. . . . A dandy piece of celluloid to see and hear, if you're feeling blue—or, even if you're not, but like laughs anyway. "The Cocoanuts" is an immensely funny show. It is one of the funniest shows in town. Readily I recommend "The Cocoanuts," for it will slay depression and stimulate loud laughter, and films as I know them, are not often just like that.

## Co-Operative Plan To Build Up Livestock Industry And Find Market For Western Grain

A plan to build up the livestock industry of Eastern Canada and at the same time provide a market for a part of the grain surplus of Western Canada, has been devised by the interested parties.

Western wheat pools, Eastern livestock interests and packers have conferred with the Ontario Department of Agriculture, the Ontario Agricultural College and the Dominion Department of Agriculture, resulting in the appointment of J. H. Newsome, the Wheat Pools' Toronto representative, and S. E. Todd, secretary of the Industrial and Development Council of the Canadian Meat Packers' Association, to work with the governments in furthering the plan.

Hon. George Weir, Minister of Agriculture, has authorized the Dominion livestock branch to put into operation for a period of five months ending January 1, 1931, a feeder purchase policy which will enable the Eastern Canada livestock raiser to supply his stock from western herds.

Under this policy the Dominion branch will pay one-way railway fare berth and living expenses en route of any applicant in Eastern Canada who agrees to purchase one or more carloads of steers or feeder lambs in the west, to be brought east for finishing on the standard prices of grain feeds which the Wheat Pool guarantee to supply.

The plan, already in operation, is designed to make of the agriculture and animal husbandry a co-operative business; to have grain growers skim the cream of good profit in the fat seasons and operate at cost in the lean; to have cattle breeders reap a harvest when the grain is low and operate at cost when grain is prospering.

### Unnecessary Loss Of Life

No Excuse For Fatalities Due To Automobile Accidents

Here is a striking comparison and one which merits study; the American fatalities in action during the World War totaled 37,688; the American fatalities from automobiles during 1929 totaled 33,061. This fact is driven home in a recent cartoon by J. N. Darling, published under the caption "Why All This Discrimination?" That the number of automobile fatalities calls for prompt and drastic action no one will deny.

Just the same, there is another side to the shield, which it were well not to ignore. These 37,688 fatalities of the war years were mostly men in the prime of life, who were sacrificed to the world's intolerance and hate. They were drawn performance to the maelstrom of destructive forces in the inevitable turmoil of war's frightful ravages. The 33,061, of 1929, were victims of foolishness and carelessness in many cases. It is true, but more particularly of the fact that to date one of the greatest advances in the world's material history has not yet been completely controlled.

Before passing final judgment on this situation therefore, it might be well to balance the countless frightful after effects of the war, aside altogether from bodily injuries against the equally countless blessings that the automobile has conferred on millions of individuals. After all is said, however, nothing can excuse the unnecessary and inordinate loss of life due to the automobile. That an agency so capable of good should be linked in such close association with tragedy is in the highest degree deplorable. This fact calls for the greatest individual care and watchfulness as well as vigorous legislative measures. — Christian Science Monitor.

Soap in very hot water is probably much more fatal to bacteria than soap used in warm water, a British physician states.

It now takes only four days to cross the Sahara Desert from Algiers to the Niger River by automobile.

Drunk: "Hands up, or I fire!" Stuttgart Illustration, Stuttgart.

W. N. U. 1854

### Immigration Returns

58,573 Entries To Canada During First Four Months Of Present Fiscal Year

Immigration to Canada for the first four months of the present fiscal year (April, May, June and July) amounted to 58,573, according to a statement issued by the Department of Immigration and Colonization. This compares with an immigration of 94,214 for the same period a year ago, and shows a falling off of 35,941 or 38 per cent.

By major classifications immigration for the four months this year compared with the same four months a year ago was: British, this year, 19,317, last year 41,054; United States, this year, 12,075, last year, 14,773; northern European, this year, 11,109, last year, 17,797; other races, this year, 15,772, last year, 20,590.

During the period from April 1 to July 31, 13,000 Canadians who had gone to the United States intending to stay there returned to Canada for permanent residence. These are not included in the immigration returns.

(By Annehelle Worthington.)

Black and white printed crepe silk is conspicuously smart for daytime wear.

This interesting model favors the plaits that are unmistakably fashionable. They give a becoming flare to the skirt without adding a fraction of an inch to the slim straight silhouette.

The shawl collar is white crepe silk. It ends in a most unusual manner at the left side, indicating the natural waistline. Beneath the buckle the bodice is caught in plaits that create a softened line across the front.

Its simplicity makes it particularly attractive for street without a topcoat.

Style No. 2564 can be had in sizes 12, 14, 16, 18, 20, 22, 24, 26, 28, 30, 32, 34, 36, 38, 40, 42 and 44 inches bust.

Wool crepe, cotton tweed, shantung, printed linen, silk pique and tub silks appropriate.

Pattern price 25 cents. Be sure to fill in size of pattern. Address Pattern Department.

### Advantage Of The Silo

More Silos Should Be Constructed In The Western Provinces

The silo is a valuable means of storing feed for winter use or to supplement the pastures in spring and fall. By properly packing it, particularly at the edges, when filling, and by removing six inches per day, a succulent nutritious feed is available for all classes of stock at all seasons of the year, with very little waste.

Silage has certain laxative properties which keep the digestive organs of animals in good condition. Animals receiving some kind of succulent feed have keener appetites, softer and more pliable skins, and a more thrifty, more healthy appearance than those fed exclusively on dry rations.

Each year is marked by the erection of a few more silos in the prairie provinces; but unfortunately the number is not so large as is warranted by the success which attends their use. At the Dominion Experimental Station, Lacombe, Alberta, three general types of silos, the above-ground, the pit, and the trench, have been used for a number of years with such excellent results, that we have no hesitation in recommending them to anyone keeping a number of live stock.

The above ground wood stave silo gives satisfaction as far as it can be given in this climate of cold winters. Freezing is the great drawback. Where it is built in the open, excessive freezing can be prevented by blowing a straw stack around it at threshing time and the straw can be used for bedding in the spring and summer. A silo 16 feet in diameter by 36 feet high holds about 150 tons of feed.

In sections where the water line is far below the surface of the soil, pit silos might be used. They are no easier to fill and more difficult to get the ensilage out of since a hoist must be used, but they have the advantage of being easy to construct since the farmer's main outlay will be in the form of labor and the ensilage does not freeze.

One of the desirable features of the trench silo is its low cost. Any farmer can make one with practically no cash outlay. A few days with a team and scraper will excavate a trench the required length and depth and some straw will do as a cover. During filling the ensilage should be kept spread evenly and well tramped.

The usual depth of the trench silo is 8 feet. A width of 14 feet at the top and 10 feet at the bottom is the usual width. A herd of 15 cows will require a silo 50 feet long.

A trench silo should be located only after careful consideration of the drainage, soil, and feeding convenience.

### Big Salmon Pack

British Columbia Pack Largest For Good Many Years

Yielding the largest pack for a good many years, the run of salmon in British Columbia waters has more than held its own for the current season to date, according to the Chief Supervisor of Fisheries. The pack of the sockeye, so far, amounts to 308,000 cases, the largest since the brood year 1925, and comparing with the last ten year average of 304,000 for the whole season.

Preliminary drilling at Ceuta, Spain, in connection with the proposed tunnel under the Straits of Gibraltar, will be started shortly.

### Beautifying Highways

Planting Of Trees Along Main Highways In Western Provinces Would Be Excellent Plan

The good roads movement is branching into new channels. Up till recently the emphasis has been on highways themselves. The spread of motoring produced a demand throughout Canada and the United States for all weather roads linking centres of population. Today the results are visible in every Canadian province and American state. Now the good roads advocates are turning to other features of highway work. At its last convention the American Automobile Association passed a motion instructing its legislative committee to study highway aesthetics. There are three objectives:

To regulate advertising signs on highways so that they will not mar scenic views or add to the accident hazard;

To banish the broken down motor cars and junk heaps which spoil many roads and have a depressing effect on temperamental motorists;

To encourage the improvement of highways by tree planting, boulevarding and other methods.

The program in one which motor clubs everywhere will sympathize. In Saskatchewan plans for beautifying roads might seem premature, since the province's need for all-weather highways is not yet satisfied. Saskatchewan is still in the road building stage and for some years to come grading and graveling will be the varieties of road work most in demand. Still, there is no reason why something should not be done now to conserve and create beauty on the provincial highways.

First of all, advertising signs might be "regulated" with greater severity. In the national parks of Canada the eyes of the motorists are immediately relieved by the complete absence of all signs, bills and posters, except government road markers. Not even the small advertisements which are attached to telephone poles and trees are permitted. The traveller is not distracted by these thin plates and stickers which infect other parts of the country. It may be that absolute prohibition is the right way of dealing with the billboard blight on country roads, but at any rate regulation is essential if the highways are not to become nightmarish.

Tree planting on rural roads would immensely increase the pleasure of motoring in Saskatchewan. A start could be made on one of the most frequented highways near some centre of population. Motor clubs should study the question and evolve a proposal. — Saskatoon Star.

### Real Postal Service

Letter Was Recently Delivered By Map On Envelope

"Believe It or Not," a letter written by a Rochester angler and addressed "To Rentor of Boats on Candice Lake (E. by N.E. shore) near Hemlock, N.Y." and was delivered the following day.

To aid the mail carrier in finding his man, whose name the sender did not know, the writer drew a map on the envelope, showing Hemlock, Candice and Honey Lake, with an arrow pointing to a spot labelled "Here it is."

Twenty-five hundred tons of heavy machinery and field supplies for a dredging company in Australia are to be transported by aeroplanes to the scene of operations.

### Babies At The Fairs

The Red Cross Provides A Valuable Service To Mothers Attending Summer Exhibitions

The great event of the year to many prairie women in the province of Alberta, is the annual fair and exhibition which is held in the largest central town, and draws attendance from every remote homestead.

Agricultural exhibits vie with each other for the prize of the people, and there is abroad a good feeling of healthy camaraderie and rivalry. A special place is given to the women's work, and in every country fair one can see the tribute of the people, and the rolling pin, the fruits and vegetables making a wonderful picture of color and beauty.

Seeing the Fair and enjoying the Midway is all the vacation that some farm women get from year to year. However, with small children, some in arms and others trailing behind, there is not much peace or pleasure. The Alberta Red Cross, one of the friendly and most human of the service organizations of the day, offers an unique-type of assistance to mothers at a number of the Fairs.

Well equipped day nurseries are run by experts, where babies sleep in small cots and cradles, older babies enjoying the sport of sandpiles and swings. Refreshments are served free in some cases and a happy day is enjoyed by the small people who are so young to be entertained at the Grandstand. "Red Cross has given me a real holiday, the first in my life" was the tribute paid by one tired mother.

### Business Picking Up

Increase In Trade For Canada Is Shown By Statistics

A slight picking up in trade in Canada is indicated by early statistics for July, issued by the Dominion Bureau of Statistics. Increased imports of raw rubber over the preceding month, and increased exports of manufactured rubber goods would indicate increasing activity in the Canadian rubber industry. Newspaper exports in July were higher than in June, and exports of other paper manufacturers were well maintained.

Dairy products were exported in larger quantities, particularly cheese and butter, with China taking a large proportion of the butter exports, and Great Britain and the Irish Free States taking the bulk of Canada's cheese. An increase in exports of fresh milk to the United States is noted.

### Wheat For All Parts Of World

Vancouver Has Attained Importance As A Grain Shipping Port

During the 1929-30 crop year which ended July 31st last, a total of 465 ships loaded 49,673,282 bushels of grain at the port of Vancouver for world ports. This means an average of more than one ship for every day in the year. Of this total 39 ships took full cargoes at the port.

A survey of the shipments for the season shows that 314 vessels were loaded with 42,828,497 bushels for the British Isles and European ports, 99 took 5,617,228 bushels for the Orient; 34 ships with 817,550 bushels cleared for Central and South America; 11 carried 121,264 bushels to Australia and New Zealand, and seven loaded 288,363 bushels for South Africa.

### Predicts Mild Winter

A mild winter with a light snowfall and sharp cold waves of short duration will be experienced in North America this year, delegates to the International Apple Association at Grand Rapids, Mich., were told by Herbert Janvin Browne, of Washington, long range weather forecaster. He also predicted a hurricane would strike Florida late in September, and said there would be no serious drought through the country next summer.

### To Help British Farmers

In order to help British farmers, the proprietors of "Ovaline," the food beverage, are using nothing but British milk—thousands of gallons a day—and British barley. In order to obtain an adequate supply of British eggs they are establishing a 300-acre egg farm.

### Prairie Harvesting

Combines are used to harvest wheat, oats, barley, spring rye, flax, sweet clover and broom from Winnipeg to the foothills of the Rockies and from the International Boundary to the Peace River district.

A survey of Canada's coal problem, a restatement of the anomalies of the nation's existing fuel situation, and some recommendations concerning the future are contained in a volume published called "The Fuel Problem of Canada," by Martin Nordegg, of Ottawa.

Mr. Nordegg, who has been intimately associated with western coal mining for many years, first of all looks over the present situation, and in doing so discloses some striking facts. Canada uses 33,000,000 tons of coal annually, of which 20,000,000 are imported. Yet Canada holds one-sixth of the total coal reserves of the world, most of it of sufficiently high quality to take the place of imported coals. At present the prospect of remedying this situation seems to the author to be not very rosy. Ultimate fuel independence, he put far into the future.

There are, according to the book, many factors which contribute to this anomalous coal situation in Canada, among them being wasteful and inefficient control of the coal industry as a whole; the duplication of mines; the failure of coal owners to look beyond the mere profit and loss side of their business; the failure of the railways to make the most of their opportunities; faulty and incompetent methods of marketing; and a general apathy on the part of the public and governments.

Mr. Nordegg's chief recommendations for putting an end to the present system are as follows: The introduction of low temperature carbonization coke plants in Canada; appointment of a Dominion fuel commission with wide powers; and ample funds; cancellation of unworried mine leases; the formation of new mines only when economically justified; readjustment on reasonable lines of tariff and drawback arrangements; elimination of duties on coal-mining tools and machinery and various forms of provincial taxation; the merging of existing mines wherever possible; the formation of coal syndicates for co-operative marketing and improved retailing methods.

"There must first be brought about a unification of minds bent on national welfare," adds the author, "a deliberate policy of national, local and provincial interests. There should be no half-hearted measures. There must be a determined Canadian fuel development plan."

### Costs Of Harvesting

Plan To Study Costs Of Different Methods Used In Saskatchewan

Plans have been made for studying the costs of harvesting Saskatchewan's 1930 grain crop by the different methods now in use. The Department of Agricultural Engineering, and the Farm Management Department of the University, are attempting to interest farmers in keeping track of all costs incurred in harvesting and threshing the crops.

To facilitate the recording of the costs of operation of the combined harvester-thresher a card has been printed for distribution to the farmers of this province. This card is similar to one printed earlier to record the costs of operating the farm tractor.

These cards are available for free distribution to those who care to make use of them and who wish to find out their costs of harvesting and of tractor operation.

### Macaroni Factories

Canada has twelve factories for the manufacture of macaroni and the annual production has a value of about a million and a half dollars, according to the latest figures from Ottawa.

Whistles and bells in cities are softer in tone if more tin is used in their manufacture, according to a British specialist in metals.

Scientists of the Byrd Antarctic Expedition discovered lichens growing within 300 miles of the South Pole.

"Did you see a hat fly by?" Yes, but it didn't fit me, so I let it fly by."—Lustige Kölner Zeitung, Cologne.

# Wheat Pool Members!

## Why Menace Your Own Elevator System

### By delivering your wheat to Non-Pool Elevators?

No other elevator system can give the same fair treatment to one and all as can the Alberta Pool Elevators.

Your own money to the extent of millions of dollars is invested in Alberta Pool elevators. By patronizing these elevators to the fullest extent you will safeguard this large investment.

Your loyal support and patronage of the Alberta Pool elevator system NOW means everything to your organization.

## DELIVER YOUR WHEAT TO POOL ELEVATORS!

# LUMBER, COAL, PAINTS, ETC

How about giving your house or barn a coat of Paint this summer. Farm implements last much longer if they are kept painted.

# VIKING NEWS

The first load of 1930 wheat was brought to the U.G.C. elevator on Friday from the Wm. Nearing farm, twelve miles northeast of town and graded No. 2. This wheat is being threshed by a combine.

Frank Nundahl, of St. Paul, Minnesota, has joined forces with B. W. Runyon and the new barber firm will be known as Runyon & Nundahl. Mr. Nundahl comes highly recommended as an experienced barber and is moving his family here and expects to become a permanent citizen. Mr. Nundahl has worked in this province for some time and knows the barber business thoroughly. A marcelling parlor is operated in connection. Note the announcement in this week's issue.

A. B. Crosse left last Thursday for his old home at Pocahontas, Iowa, where he will attend the sixtieth wedding anniversary of his parents who reside there. Eight children are living, four boys and four girls, all grown up. A. B. is the only one of eight who left the old home town for Canada some years ago.

R. Crosse started threshing on Monday a field of Reward wheat that averages 50 bushels per acre. A sample brought to the local elevators graded No. 1. Mr. Crosse says the wheat was sown well and is the coming year's crop.

The monthly meeting of the Ladies Auxiliary of the United Church will be held in the Church Hall on Friday afternoon at 3 o'clock.

Among the improvements noted about town this week is the painting of the front of the King Edward Hotel, and new cement steps in front of the Red & White store, Runyon & Nundahl barber shop, and Farnham bakery. This shows progressive even in times like these.

Ed. Kirsch returned to his home at Auburn, Washington, after spending two weeks here attending to business matters and visiting with relatives and friends.

J. L. Dadds left on Monday evening for Vancouver and other coast points where he will enjoy a well earned vacation.

The construction crews of the Calgary Power Company are again busy in and round town after being away for a few days. The line should be completed in about a month.

The Johnson brothers, 10 miles northeast of Kinross, started threshing on September 5th and the oats are yielding 65 bushels per acre.

Wm. Crowthers, former assistant agent here, is here in charge of the local station while Mr. Dadds is away on a holiday.

Miss Myrtle Clark, of the Kinross district is attending high school here.

Mrs. J. L. Dadds who was confined to the hospital last week is able to be home again.

Born to Mr. and Mrs. Harry Lawes on Thursday, September 4th, a son, at the local hospital.

# Alberta School of Religion

Rev. Mr. Bainbridge Gives Synopsis of the School of Religion Held at Edmonton

The Annual Summer School of Religion was held at St. Stephen's College, Edmonton from August 10th to the 20th. This School was commenced seven years ago by a group of Methodist ministers, and, since the Union, its executive has been augmented by former Presbyterians. The School is concerned with Life, fuller and more abundant life, and it offers advanced courses to leaders, men and women of any profession or religious denomination. This year there were about 110 registered members and a large number of adherents.

The lecturing staff included: Prof. J. Cassels of the Economics Dept. of the University of Alberta; Rev. Dr. A. D. Miller, of St. Stephen's College; Mr. E. J. Garland, M.P., Bow River; President R. Wallace, of University of Alberta; Mr. Wm. Irvine, M.P., Wetaskiwin; Rev. Prof. W. T. Brown, of Yale University; Dr. Trevor H. Davies, of Eaton Memorial United Church, Toronto, and Dr. Cheng, Moderator of the United Church of Christ, China.

Dr. Davies gave a course of five lectures on "The Preaching of the Gospel in relation to Modern Life," and four lectures on "Records of Great Spiritual Adventures." The pith of his messages might be centred in his statement "The Power of the Church rests with its contact with the Spirit of Christ," and was well illustrated by his reference to Channing Pollock's successful play "The Fool." In this play the writer portrays a young minister who lives like Jesus. Great audiences of all classes have crowded to witness the Life of Jesus being actually lived out to-day, showing clearly that after all the world really wants reality and is craving for the Spirit of Christ.

Prof. Brown dealt with the Christian Religion as it faces up to the intellectual realm and the practical problems of the thinker today. He discussed religion as it is expressed by the three types of mind, viz. the Priest, the Prophet and the Sage, and proceeded to show that we need all three factors integrated in the life of man. In one of his lectures he took up the much discussed question of Moral Authority, and made this conclusion, "Moral Authority consists of 90 per cent. inherited standard customs, and the other 10 per cent. of a discovery made by the individual reaching out to the Centre and Source of Morality which is above the human. In his last two lectures he dealt with various movements now seeking to counteract the Freudian or Six Psychology which has swept through so-called civilization during the past twenty years.

Ten lectures were on the Economic and International Relationships of Life. Mr. Garland dealt with Disarmament as one hope for World Peace, but pointed out clearly that Disarmament so far had been a farce. Prof. Cassels, in dealing with the subject of Unemployment, quoted Thomas Carlyle, "A man willing to work, capable of working, and yet unable to find work, is the most pathetic sight under the sun." The lecturer continued "Unemployment is the most terrible indictment of our present economic system." Twenty-five millions are now out of work, with Poland, U.S.A., and Great Britain suffering worst, and Canada ranking eighth.

The chief cause is Modern Mechanization. Then he dealt with the British Dole system, explaining that it was so far the best national scientific attempt to handle the situation. Mr. Irvine's chief contention was that today we suffer from under-consumption rather than from over-production. He laid down four simple facts, viz. The Actual Needs of the individual if supplied would provide an immediate adequate local market; We have in Canada incalculable Natural Resources to supply these needs; We have sufficient Plants to handle these resources; Bring these three together and our Unemployment Problem will be solved. Then he dealt with the question of Surpluses, the impractical nature of our Credit and Banking systems; the imminent danger of our present financial system, and as remedies recommended the systems proposed by Prof. Soddy of Oxford University and Major Douglas.

The Missionary phase of the School was handled by Rev. Dr. Cheng. He explained some of the internal problems of the United Church in China, as well as setting forth some of the lines of opposition, but went on to inform us that the Christian Church in China is making real progress as witnessed among outstanding individuals and families as well as definite influence in the community, government and national life.

Two great impressions might be

# THRESHERMEN AND WEED PROBLEM

Mr. Huxley, Weed Field Supervisor Hands Out Some Timely Advice Re Threshing

Everybody is busy. All attention is focused on the sheaves going in and the grain coming out. Time is precious and everybody is on the jump.

Then comes spring. Luxuriant growth of strange weeds appear and Stinkweed appears where it was never seen before.

"It must surely come from a spaw, like the mushroom," reasons the farmer.

"You're wrong there; replies his friend. "Don't you remember how you rushed your Thresher here from the Jack Dohickey quarter because you wanted to finish before Sunday. That is where your weeds came from."

This is obviously true and in some cases the Farmers blame the Government, the Municipality and the weed-inspectors.

I have spoken to several threshers about the same thing.

"There is no use in cleaning up the rig and the racks," one told me for it is impossible to get every weed seed out."

We agree with him here, but our experience has taught us that we would far rather contend with the few weeds from a clean machine than from the million from an uncleaned machine.

Sometimes they have to be reminded but usually every thresher is willing to clean up. Defaulters can be prosecuted under the following sections of the Act, Section 19, which is to the effect that every thresher must clean his machine and equipment before moving on another farm and Section 20, which requires him to display a part of the weed act on his machine which concerns threshing. Furthermore the Farmer is responsible for the destruction of the Noxious weed seeds left by the Thresher. The weed inspectors are going to make a special effort this year to see that this part of the act is complied with.

Let's avoid any trouble, Threshermen, and clean our machines thoroughly before moving and keep the weed racks displayed on the machine so as all will know what is required. Thus we will do our duty to our patrons and our community and save time by avoiding unnecessary unpleasantness with the inspectors.

—P. D. Huxley, field Supervisor, Wainwright.

## UNIFORM LAWS FOR PROVINCES WILL BE SOUGHT

Ottawa, Sept. 8th.—Renewed efforts to secure inter-provincial uniformity in laws are expected to follow the change in Government at Ottawa.

Some progress in this direction has been made during the past two years but the successes achieved cover a very minor fraction of the laws in which uniformity is considered desirable.

Property, company, insurance laws, motor laws, compensation acts and social legislation are all within the scope of statutes in which uniformity, as desirable, is held, in the interests of the public as of parties immediately concerned.

With respect to civil law Quebec, under the Cur Napoleon, has always presented difficulties to national uniformity. Law officers who have studied the subject, however, believe that a great deal more in that direction may be achieved. It is being suggested that when progress with Quebec has been exhausted the other provinces continue their efforts in the same direction.

Uniformity will, it is claimed, very materially reduce litigation, simplify the conduct of inter-provincial business and result in important savings in legal fees by the public.

A local young lady consulted a fortune teller in Edmonton last week and the fortune came true. The fortune teller told her she would receive several interesting letters, and when she got home she found that her mother was serving alphabet soup.

Gained from the School, first, that we are living in Crucial Days. Those who live our allotted span will witness tremendous changes in Economic, Educational, International and Religious Life. Second, the Christian Church holds the only safe keys to the solutions of these great transitional problems. Only Christianity can give anchor to stabilize, inspiration and confidence to rightly tackle these problems, and Dynamic to bring about the transformation.

## A PAIR OF SPECTACLES

Not long ago a man was taking his young son through a picture gallery and on pointing out to the lad the features of a certain picture was surprised to discover that he had defective eyesight. So, he was taken to an oculist, fitted with a pair of glasses, and afterwards the boy said he saw a new world. The picture and all the other things that came within the lad's vision did not change. The change was in the lad himself. The glasses remedied the defect. The boy had become normal and, therefore, capable of appraising what he saw.

This opens up a large field for reflection. What we see depends upon our power of seeing. As we are so well will the world be to us. I have often wondered what a blind man's idea of the world is. Perhaps an alteration of light and darkness only; for not having an idea of color he could not imagine blue, purple, or yellow or any of the other colors of the spectrum that delight the eye and satisfy the taste of the ordinary, normal person. There are people, also, who are color blind; all colors appear the same to them. Some people are near sighted, and distant objects are a blur, while there are far-sighted people who cannot appreciate the things that are near; glasses usually rectify these defects.

The physical world is largely a matter of vision. Two men see the same thing, yet they don't see the same thing. There are utilitarian glasses and ideal glasses. It is possible for two men to see a wood, the one appraises in terms of cordage, or feet of lumber, with an amount of coin of the realm attached; the other sees with the eye of the artist and money never enters into the calculation. A traveller in Ireland recently encountered a peasant seated on a hill overlooking a marvelous sea view. In conversation, the traveller discovered that the peasant had once lived and could live more comfortably in a certain city. On being asked why he did not live in the city he pointed to the beautiful view and said, "You don't get that in the city." Again, it was the matter of sight—and insight. This plain man (as we call him) had something that his more fortunate (?) acquaintance entirely missed.

"We see what we are prepared to see." Nor is it different in the world of commercial and social relationships. Listen to a number of men who follow the same pursuit, or have the same interests and it will be found that they wear the same kind of glasses. There are many and varied glasses, and each pair gives the wearer, as he thinks, a true view of the world. There are workers' glasses and employers' glasses, and in few of these is the color, or the focus the same.

In the realm of character the same thing holds true. There are those unfortunate ones who see the worst side of everything and everyone. They question every motive and are prepared to put an interrogation mark after every act of another. Such persons need glasses and a different world would be the result. One writer of long ago very sagely said, "travelers, listen to the world and you will never meet anyone but yourself in all your travels," which is another way of saying that "we see what we are prepared to see." If one appears to us full of faults and flaws it might be only just in us to consider seriously whether fifty per cent. of the objectionable features are not in us to see. Life in some degree is a mirror, the face that looks out of the mirror is the face that looks into it, and the mentor and critic of his fellows would do well to take care before he blazes abroad his criticism. He to whom everyone is a hypocrite is quite probably a hypocrite himself. The teacher of others is not necessarily a saint; were he such his humanity would make his strictures impossible.

Most of us require glasses, glasses of introspection by which we might take a good look at ourselves, glasses of kindness, glasses of benevolence, and equipped with these what a different world would emerge! It is not meant that we should see the thief as if he were an honest man, or the liar as anything but a liar, nor should we relax our vigilance for breaches of decency and morals; but just as wise people have their glasses examined periodically, so should we test our outlook, in order to be certain that the world is wrong but that we are right. — Canadian National Magazine.

The modern way: "Well, doctor," said a young father here awaiting the news, "will it use a razor or a lip stick?"

## M.D. KINSELLA No. 424 Council Minutes

### MINUTES OF MEETING

M. D. of KINSELLA No. 424  
MONDAY, SEPT. 1st, 1930

Full Council present.

Coun. Carter minutes be passed as read.

Coun. Carter that Coun. Bowden be Deputy Reeve for the ensuing 6 months.

By-Law No. 28 being read for third time. Coun. Bowden that By-Law be passed.

Coun. Albrect that application for Old Age Pension for R. G. Martin be approved.

Coun. Bowden that Weed Inspector Plummer inspect all reported cases of Perennial Sow Thistle and Canada Thistle and act accordingly.

Coun. Murray that application for Restaurant License for Jim Wong of Kinsella be approved.

Coun. Bowden that report of Committee re F. Hardy's effects be accepted.

Coun. Carter that following bills be passed for payment:

A. General ..... \$39.00

B. Rud ..... 14.40

A. Magak ..... 10.90

P. G. Martin ..... 7.20

A. Mullen ..... 14.00

R. McPherson ..... 5.00

H. Osbak ..... 5.00

A. Mun. Stationers ..... 4.45

Irma Times ..... 24.00

Express ..... 1.50

A. Gov. Tel. ..... \$265.55, \$50.55,

\$236.95, \$433.20, \$148.95, \$199.80.

Carried.

Coun. Carter meeting adjourn to call of Secretary.

B. H. GREEN, Sec. Treas.

## LOUGHEED

Miss Marie Rogers entertained at bridge on Wednesday evening, August 27th, at her home in honor of Miss Bessie Caudwell, who left Monday for Edmonton.

The guests were: Misses Elsie Irish, Julia Malloy, Mary Chamberlain, Edyth Caudwell, Florence Hoffman, Verna Morrison, Ruth Paul, Lillian Smith and Luella Harney, also Dave Walmsey, John Calvin, Howard La Russa, Norman Brown, Fred Lornie. At the midnight hour the hostess served a tasty lunch.

Miss Bessie Caudwell departed by train for Edmonton Monday morning where she will attend the McDougall Commercial High School.

Miss Erna Johnson left by train Tuesday for Camrose to attend the Normal school this term.

Those attending the Camrose Normal school from Lougheed: Miss Frances Reeves, Erna Johnson and George Westra.

Mrs. Marlow has returned to her town home, after spending the past year on her farm south of the village.

Dave Walmsey is leaving in the near future for Edmonton where he will complete Grade XI and take XII.

Teachers in the schools of this district for this term are as follows:

Valley—Miss Bernice Elliott, Olds.

Park: Miss Clark, Camrose; Hill Park: Miss Myrtle Paul, Lougheed; Graveland: Miss Fouty, Lougheed; Parkhill: Miss Beth Lange, Killard; Calladonia: Mrs. Baxter, Lougheed; Goose Creek: Miss Lettie Strachan, Sedgewick; Hazelwood: Miss Ellen Payne, Botha; Melbrae, Miss Janet Wilson, New Norway.

Will Wheat Pool Survive Present Crisis, is Query

May Break Up Into Smaller and More Efficient Units, Says Boyle.

Pool Heads Confident

Will the Canadian Wheat Pool survive the severe strain it has been passing through and retain its present form? Pool authorities declare their members will remain loyal to their contracts and that the organization will come through the testing period stronger for it.

James E. Boyle, writing in Barron's takes a different view. Mr. Boyle is a keen student of the world wheat situation and took pains to gather first-hand information on Canada's grain marketing problems.

His conclusion is that the pool will ultimately disappear, probably by breaking up into a number of smaller and more efficient units.

Mr. Boyle's finding are as follows: "A large selling corporation, like the pool, which holds the bulk of the crop off the market till spring or early summer, is sure to make money on a rising market and sure to lose on a falling market. Since markets rise as often as they fall, this might seem to imply an even break for the pool. Evidence gathered by all students of the grain trade, so far as I know, shows that the rise in price from autumn to spring and early summer is in the long run and on the average enough and only enough to cover a carrying charge of a little less than one cent a bushel per month.

"Few agencies can carry grain as cheaply as this; therefore the fixed policy of withholding a substantial percentage of grain beyond the heavy fall movement is sure in the end to bring a loss to the farmer. In the regular grain trade this speculative risk of price changes is borne by speculators on the futures market. In the pool, the farmer is his own speculator, and is sure in the end to lose a few cents a bushel by it, because the pool cannot carry his wheat

The local Public and High School re-opened Tuesday, September 2nd, with the same staff in charge. They are: Principal, Mr. K. Tooke; Intermediate Room, Ray Martin; Primary Rooms, Mrs. E. Tooke, Miss E. Madge Vorhees.

Miss E. Madge Vorhees and sister Bernice of Alliance are living in the house owned by J. Schieddiecker.

Miss Helen Adams left Monday morning for Louisiana where she will take Grade XII.

Norman T. Haddow of Red Deer is now on the staff of the Bank of Commerce, Fred Lornie, former clerk, is to leave Monday for Calgary.

Mr. and Mrs. T. Heath and family left Friday, last, for Wetsaskiwin, where they will make their future home. They will be greatly missed in the large circle of their friends, who all wish them much success and happiness in their new location.

Miss Alberta Heath is now staying at the home of Mrs. Bella Brown and is on the local telephone staff.

Miss Myrtle Paul left town Sunday for the Hill Park district where she will again teach school this term.

The Ladies Aid of the St. Andrew's Church will hold a sale of home cooking in Tracksell's store Saturday afternoon and evening, September 13th.

Merlyn Pendleton of the Valley S. D. is attending high school in Lougheed, and is taking Grade X.

Mrs. I. C. Johnson arrived on the train Tuesday evening from New Norway. She will visit at the home of her son J. S. Johnson.

Mrs. J. S. Johnson left Friday for Portland, Oregon, where she will visit at the home of her son George.

for the small advance in prices.

"The Pool may, of course, turn at any time to the futures market and copy the sound practice of the commercial trade.

"Can the Pool survive this 1930 crisis? Here is clearly a question of loyalty. The members are under contract. Will they stick?"

"Under similar conditions in the U. S., pool members of various large pools have always deserted the pool. Will the Canadian farmer behave as American farmers do? The testimony I gathered from various sources in Canada was to the effect that these farmers would stick; they were glutted for punishment; the pool was their religion; they would not break a legal contract. My own impression is that these farmers will break away in large numbers when they see the new card of prices. I also feel certain that the pool will ultimately disappear, probably by breaking up into a number of smaller and more efficient units. At present it is not an efficient marketing agency."

ALBERTA ROAD SAFETY SIGNS BEING PLACED

Road signs at strategic points along the 1,000 miles of Alberta's main highways are now in the process of erection, according to Hon. O. E. McPherson, Minister of Public Works. Most of those planned for the southern part of the province have been erected. The signs indicate a curve, give proper warning as to crossings and other dangerous points and numbers of highways. They are of yellow and black colors and in type and style are along the same general lines as those used in British Columbia, Saskatchewan and Manitoba and the sections of the United States bordering on the western provinces.

This year, only the main highways will be marked with the signs.

## NEWS ITEMS FROM KINSELLA

### KINSELLA

Mr. and Mrs. J. Neale and family spent Sunday at Vermilion with the latter's parents.

Miss Barbara Maloy of Lougheed is visiting her Aunt Mrs. W. L. Ferries.

Mr. and Mrs. Lundy-Beschell, Mr. Justik and son Victor of Killam, spent Sunday with Mrs. Justik here.

Mr. William Anderson of Edmonton spent Monday and Tuesday here.

Mr. Fred Loades who is working in the garage here spent Sunday at his home in Viking.

Mr. and Mrs. Kerns of Edmonton are visiting at the home of Mr. Robert Cormack.

M. D. of KINSELLA No. 424

NOTICE is hereby given that By-Law No. 28 will come into effect on September 17th.

The By-Law means that: After September 16th, only stock belonging to resident Ratepayers of 46-10-11 and 12 are allowed to run in 46-10-11 and 12.

Each resident ratepayer of 46-10-11 and 12 may run 25 head per quarter section owned by him or her or in proportion thereof, and no other stock may run. No stock can run in 46-10-11 and 12.

B. H. GREEN, Secretary-Treas.

NOTICE RE WEEDS

The Council have given instructions to Mr. J. W. Plummer, the Municipal Weed Inspector to write to all ratepayers whose farms last year were reported as being infested with Perennial Sow Thistle and Canada Thistle, instructing them to take steps to eradicate these weeds. He is following this up with a personal visit and should these instructions have been neglected, he has orders to take action.

He is also checking up on threshing machines to see that they are complying with the Weed Act.

Farmers are also notified that they are responsible for the immediate destruction of the weed seeds after threshing.

B. H. GREEN, Sec. Treas.

1st MELGROVE VALLEY GIRL GUIDES

On Saturday August 23rd the girls of the above Company had as their guests, the Captain, Miss Rossitor, and girls of the 1st Sedgewick Guides.

A regular company meeting was held when knot tying contests, flag games and tracking were indulged in, besides singing rounds. Edith Routledge brought in the completed needlework for her Needlewoman's badge.

In the jelly eating race the Daffodil Patrol (Melgrove Valley) came first and the Canaries (Sedgewick) came in second.

The meeting closed with the formation of the horse shoe, the singing of the Guides Hymn and the Guide's Prayer, led by the Rev. G. Gower, B.A. of Sedgewick.

An invitation has been extended to the Melgrove Valley Guides to visit the Sedgewick Company during the Fall, an invitation they hope to accept.

Mrs. A. Christenson has kindly offered the use of her home for the next regular meeting of the Company.

### VIKING

Miss Myrtle Holmer who has been a visitor here with friends returned to her home at Bruce on Saturday.

W. J. Brown who has been at the hospital suffering from blood poisoning is reported to be doing well.

Mrs. R. J. Darrah, daughter Maxine and son Douglas left on Saturday for Vancouver after spending the summer here.

Mrs. C. Skinner and little Mary Jane, of Edmonton, are enjoying a stay at the home of Mr. and Mrs. Dadds.

The annual meeting of the W. C. T. U. was held at the home of Mrs. H. M. Hillier on Thursday afternoon, September 4th.

The reports showed a fairly successful year's work.

There was a small balance on the right side of the treasury.

The officers for the ensuing year are:

President—Mrs. H. M. Hillier

Vice-Pres.—Mrs. C. G. Purvis

Treasurer—Mrs. G. T. Armstrong

Co-Secretary—Mrs. O. Fitzmaurice

Rec. Sec.—Mrs. H. B. Collier.

YOUR PRINTING NEEDS

The News printing office is now in a better position than ever to attend to your printing requirements. A good quality of stock used on all jobs, and the printing is as good as you can get anywhere. We meet city prices, and in many cases are considerably lower, stock and workmanship considered. May we fill your next order?

## WORLD HAPPENINGS BRIEFLY TOLD

Ruth Alexander, San Diego aviator, holds credit for being the first woman to fly from Canada to Mexico without a stop.

His Royal Highness the Prince of Wales now has three new titles—vice-admiral, lieutenant-general, and air marshal—through promotions in three British fighting services.

With the increase in motor traffic in London suburbs, divisional police cars are being used, as occasion demands, as mobile units to speed up crawling traffic.

Troops sent to release two British missionaries, Miss Harrison and Miss Nettleton, held captive by Communist bandits in Fulkien for two months, returned without accomplishing their mission.

Ontario motorists, who become involved in accidents, fail to pay judgments or are convicted of serious traffic offences, will have to be insured before they are allowed to drive again, according to a law which is now effective.

Caught by a wind as they banked around a marker on the course, Capt. Charles Sutton, Toronto, was killed, and his mechanic, Claude Mills, also of Toronto, was injured, when their Pottier plane crashed into Lake Ontario.

The interior finish for five new Canadian National dining cars was obtained from the famous Morton Walnut tree, which grew for centuries at Oxford. When the butt and roots of the ancient tree were trimmed ready for conversion into beautiful veneer, they weighed 15 tons and yielded 75,000 feet.

Twenty persons were injured when the night train from Glasgow crashed into the buffer stops at Euston Station. The first of two locomotives drawing the train smashed into the buffers and damaged the second engine, while several coaches telescoped, the third coach penetrating six feet into the second.

### The Indian Problem

Sir John A. Simon Explains Difficulties To Audience In Washington

Sir John A. Simon, head of Great Britain's Indian statutory commission, expressed hope, in a speech at Washington, for some way of advance on the Indian problem.

Stressing difficulties of the past, the British statesman asked for United States sympathy "in keeping with the United States sense of fair play."

This third visit to the United States, Sir John said, has impressed him once more with this country's "abounding vitality."

"I cannot see that this has been affected by economic conditions," he added.

The tall, blue-eyed visitor, one of England's leading Liberals, in Washington as one of a party of guests of the American Bar Association, discussed "the enormous task" in India.

"There is no division of opinion in England on our policy in India," he said. "It is, as stated in the law of 1919, the gradual development of self-governing institutions with a view to the progressive realization of responsible government in India."

The two great difficulties, Sir John said, are that the vast mass of Indians are villagers, living their lives with customs entirely different from those of "the educated, political minority," and that India is composed of "so many mixed elements that America's mixture is the palest reflection."

Ultimate solution of the problem, Sir John believes, "will not be a mere imitation of the representative government British and Americans have worked out for themselves."

He declared an effort to transport such a government to India would be "planting a seed in soil that does not grow the tree."

## GOVERNMENT GRAIN SAMPLING

System Of Sampling As Carried Out By The Government Inspection Department

The following describes the thoroughness of the system of sampling as carried out by the Government Inspection Department. We are indebted for this article to the Senior Grain Co., Ltd., Winnipeg.

Upon arrival of a trainload of grain at an inspection point a Government yard clerk lists the cars from the waybills which follow each car, listing car numbers, kind of grain, point of origin, destination, name of shipper and consignee. These details are necessary for the issuing of Inspection Certificates. Sampling crews with foremen then proceed to the train. The car opener breaks the seals and a record is taken of them. With a pinch bar the door is pushed open. A sampler then mounts a ladder, levels the grain just inside the door and spreads out a sheet of canvas two and one-half by six feet. Then comes the extremely heavy work of pushing the brass probe to the

Men Equipped With Ladders, Probes and Canvases Ready To Sample a Train

bottom of the car in a number of places. This probe is 72 inches long and has an outer sheath which, when the handle is turned, opens or closes its eleven compartments. The probe is emptied in rows on the canvas and is examined by the sampler to see if the sample is uniform in quality.

In case the grain in one part of the car proves to be poorer than the rest of the car, three samples are taken instead of one: one being of the inferior grain; another of the better grain, and another of the average of the whole car.

The sampler writes the car number on a cardboard ticket, date, load lines, showing depth of grain, and initials ticket, thus making a complete record of the sampling of each car; the grain and the cardboard ticket are put into a four-pound canvas bag and the string is drawn tight. The car door is closed and a new seal attached.

Cars are also examined as to their condition; a careful examination being made for signs of leaks and a record is made of the seals and the condition of each car, also leaks, if any. This work is done by separate crews of the Government Weighing Department.

When the entire train has been sampled, the samples are collected and are brought into the Government grain yard office, where the car numbers and the kind of grain are checked from the train list to detect any possible errors. Inspection sheets are also written up in the yard office from the train lists. After the samples have been checked the strings are drawn tight and the samples are put into boxes holding two dozen samples, and inspection sheets are despatched by truck to the Central Inspection Office for grading.

Doors Are Sealed After Sample Is Taken. Note Sample For Each Car Is Tied To Door Until Collected

In many cases, it is impossible to get a good sample on account of cars being loaded too full. A good sample means seven good probes (e.g., to the bottom of the car), as follows: One in each corner, and three down the car lengthwise. When less than seven good probes have been taken only a provision inspection is made, final inspection to be made

at unloading, and in some cases, cars are loaded so full that it is impossible to get more than one good probe, and sometimes none. Cars like this will not be inspected until at unloading.

Trains arrive at all hours, day and night. During the fall rush, trains of grain leave the Winnipeg yards every twenty minutes bound for the Head of the Lakes, and for a long period during the fall rush of 1925, upwards of three thousand cars were sampled in the Winnipeg yards every twenty-four hours.

The samplers and foremen are in line for promotion to Deputy Grain Inspectors, providing they are able to pass a very stiff practical examination set by the Chief Inspector and the Civil Service Commission.

The sampling is carefully done and the system is recognized as being most thorough; wherever possible there is a double check on the work.

Probing the Car To Secure a Uniform Sample

### All-Canadian Highway

Only One Stretch Of Road In Northern Ontario Remaining To Be Linked Up

An all-Canadian route from coast to coast is practically completed, only one stretch in Western Ontario remaining to be linked up, according to officials of the Canadian Automobile Association.

No one now needs to hesitate to travel from Manitoba, clear across over the Rockies to British Columbia. The old-time "gumbo" roads, which split disaster to motorists are now replaced with first-class gravel stretches and all dangerous curves and turns of less than 100 feet radius have been eliminated.

The one stretch of road which remains unfinished is that in north-western Ontario, passing around the northern shore of Lake Superior. With this exception the condition of the roads all through from the coast is excellent and all Provincial Governments are co-operating in the project of an all-Canadian highway.

### Some Curious Trees

Among the curious trees which have been found on the banks of the River Amazon, in South America, is one which has a sweet edible resin and with consistency of real sugar in the bark, and another which exudes an oily substance with the appearance, taste, and other qualities of lard.

### Canada's Coal Production

Coal produced in Canada in 1929, totaled 17,496,557 tons from the mines in Nova Scotia, New Brunswick, Saskatchewan, Alberta and British Columbia. Imports of coal last year amounted to 18,619,360 tons of which 14,469,831 tons came from the United States.

Man (at restaurant)—"I wonder how this chicken could live with so little meat on it."

Sid—"It didn't—thats why it's here."

### New and Appetizing

Recipe For Bacon Muffins Should Be Good

If you want to try something new and specially appetizing, follow this recipe for

#### Bacon Muffins

1. pound bacon.
2. tablespoons bacon fat.
- 1 egg, slightly beaten.
- 2 cups flour.
- 1/2 cup corn meal.
- 1 tablespoon sugar.
4. teaspoons baking powder.
1. teaspoon salt.
- 1/2 cup Borden's St. Charles Milk.
- 1/2 cup water.

Cut bacon in bits, fry-crisp and drain off fat. Stir together the dry ingredients. Add the egg, bacon fat, and milk diluted with water. Fold in the bacon. Fill greased muffin pans two-thirds full. Bake in a moderate oven about twenty-five minutes.

### Canada and World Trade

Stands Fifth As Regards Imports, Exports and Aggregate Trade

In a "Condensed Preliminary Report" for the fiscal year ended March 31st, 1930, issued by the External Trade Branch of the Bureau of Statistics, Canada is still shown in fifth place as a world trader, being fifth as regards imports, exports and aggregate trade. Imports amounted to \$2,248,274,000 and exports to \$1,144,938,000, making a total of \$2,393,212,000.

#### Plenty Of Advice

The Smithsonian Institution at Washington, is urging that farmers set aside something every year for the crop failure, which, it says, comes every seven years. At the same time the Department of Agriculture is urging reduction in acreage because supply exceeds the demand. Meanwhile, the farmers are going ahead doing the best they can as they see things.—Toronto Globe.

### Never Had a Birthday

Colored Porter Is Made Happy When Records Are Searched After 73 Years

The "office boy" of the State Department of Education, down in Frankfurt, Kentucky, is 73 years old, but he never had a birthday until a week ago. A birthday was officially presented Henry Davis, negro porter of the department, at an impromptu party in his honor after "closing hours."

Recently Davis confided to W. C. Dally, superintendent of public instruction, that he "disremembered when he was born, but that it would be the greatest joy of his life to know what it was like to have a birthday like other folks."

Tears filled Henry's eyes when he was presented with a humble certificate from Woodford County showing that he was born a slave near Versailles, August 13, 1857. The records had been carefully searched for Henry's birthday.

"I knowed I was born before freedom," said Henry. "Why I remember hearing the guns at Richmond."

### How Man Has Progressed

Big Difference Between Voyage Of "Mayflower" and "R-100"

Three hundred and ten years ago, August 16, the "Mayflower" set sail for Plymouth Rock from England. The "Mayflower," contrary to general impression, began her voyage from Southampton. The pilgrims boarded the vessel at Plymouth, but the historic event actually began at Southampton.

The "Mayflower" was a little brigantine, and took three months to sail from Plymouth to Plymouth Rock. Today, ocean liners of over 50,000 tons sail from that same port of Southampton, and reach the other side in about five days.

And a few weeks ago the passengers on the Canadian Pacific liner "Laurentic" turned their gaze upward in the sky and saw the airship "R-100" speeding toward England at about seventy-five miles an hour.

1620-1930—thus has man progressed.

### Change In Marriage Law

British Columbia Passes New Law To Check Hasty Marriages

If impulsive couples "marry in haste and repent at leisure" in future, they will have to go outside British Columbia to do it.

Under legislation which came into effect on the first of September, eight days must elapse between the time license is issued and the time the ceremony is performed.

In cases where an immediate marriage is desirable, however, special permission may be obtained.

Clergymen must be registered with the provincial authorities in order to officiate.

### Cement's Ingredients

The chief raw materials used in the manufacture of cement are limestone and clay.

Chain stores are invading Brazil.

## Great Expense To Country

Number Of Mentally Deficient People In Canada Increasing

The number of insane and mentally deficient people in Canadian mental institutions, exclusive of private hospitals, shows an increase of 1,334 persons over last year, according to this month's bulletin of the Canadian National Committee of Mental Hygiene. The total number of insane and mentally deficient people who are filling these institutions is at present 29,578.

Their cost to the country, the bulletin points out, is greater than that of war pensions and totals \$16,820,743 a year. This, however, is simply the cost of upkeep of institutions and does not take into account the money spent by private individuals on insane people who are in private hospitals. Nor does it include the loss to the country which results from keeping a large group of people unproductive.

The tendency of social service workers and mental hygiene specialists at the present time is to pay more attention to signs of mental deficiency in its very early stages. Special education is in many instances being given to children who show signs of it and more care is taken to prevent diseases of which it is frequently the outcome. Several of the provinces of Canada receive financial help from their governments toward this end.

### Battle With Snake In Mid-Air

Kansas Aviator Has Encounter With Rattlesnake While Flying Through the Clouds

An unprecedented battle in the air between a horrified pilot and a rattlesnake was verified when H. "Happy" Wiggins, aviator, obtained snakebite treatment at a Scott City, Kansas, hospital.

Wiggins said he was pounding his plane through the clouds almost a mile above the ground, when the snake reared its head over the cockpit.

"I jumped back," said Wiggins, still violently ill from effects of the snake's poison, "but the snake jumped after me."

"I tried to grasp it and pitch it from the cockpit, but it coiled and struck me twice before I finally was able to fling it away."

While Wiggins was engaged in his unique battle with the rattler, which apparently had crawled into the plane while it was in a hangar, the ship hurtled down out of control.

Wiggins finally pushed the snake overboard, righted the ship, and landed so hastily in a pasture that he almost wrecked the plane.

A rancher hurried out and dragged Wiggins, almost unconscious from fright and poison, from his seat. The rancher rushed him to Scott City, where hospital attaches said he would recover.

Galileo, the famous Italian astronomer, was the first man to look at the heavens through a telescope in 1610.

## Make Your Windows Pay

Invest in WINDOLITE Windows and you will be repaid a hundredfold in the health of your Poultry and Live Stock

# WINDOLITE

THE ORIGINAL GLASS SUBSTITUTE

MADE IN ENGLAND SINCE 1917 ON ORIGINAL PATENTS

This unbreakable glass substitute is light and flexible, easy to cut and fit, will withstand extreme changes in temperature, keeps out cold and wet, but

allows the full sunlight to enter, including the health-giving Ultra-Violet Rays, which do not penetrate ordinary glass.

Canadian breeders of poultry and livestock are finding Windolite a most satisfactory and profitable investment. Young chickens and turkeys are entirely free from leg weakness and disease and will thrive in confinement under Windolite. Windolite comes in rolls any length, but 36 inches wide only.

Distributors: JOHN A. CHANTLER & CO., LTD.  
51 Wellington St. W. TORONTO, ONT.

Little Mary wants to know what her brothers are talking about so she raps on the door and shouts: "Open the door at once! It's not me—it's mummy." — Sondag-nisse - Strix, Stockholm.

## DIZZINESS

Caused by Blood pressure.

## Doctor ordered Kruschen

"Five years ago this month I had a serious attack of blood pressure. I had a medical man ordered me to take Kruschen salts daily. Evidently I am a stubborn subject, because I use every morning a small teaspoonful and a half in a glass of hot water, and this acts splendidly and keeps my head right. If I don't have the action mentioned, I feel cold, stupid and liable to fall from dizziness. Therefore I can't do without my Kruschen on any account. Some time ago I tried some other salts which were cheaper, but they pained me so much that I had to stop them. There is no pain with Kruschen. I have told hundreds of my little wonder-working bottle." (R. L. Ferguson.)

Dizziness is a symptom of a neglected disorder. It is one of Nature's danger signals—her urgent warning of an impure blood-stream which, if not attended to in time, may wreck the entire health with some dangerous, indeed lifelong, disease. The six salts in Kruschen keep the blood-stream pure and vigorous by ensuring the complete elimination of poisonous waste matter from the system every day.

## SILVER RIBBONS

—BY—CHRISTINE WHITING PARMENTER

Copyright 1929

CHAPTER XXVIII.—Continued.

"No! I got something else—a bird's-eye view of Wickfield. I understood at last why you hated Bumpy Barcomb's windows, and things like that. I got absolutely red up on stucco bungalows, and had a fearful yearning to come home and put some gold paint on the pineapple over your front door! Guess I had an attack of what the poets and physicians call nostalgia."

He paused, while Charmian, who felt that she was making the acquaintance of a new Jim, nodded: "Go on. I find this confession most illuminating."

Jim smiled, but he flushed too as he continued: "Well, I had time to think—null things over, you understand. Do you remember when we were kids, Charmian, you said one day that the river looked like a silver ribbon from your attic window?"

"And you laughed," said Charmian, smiling at the memory. "And you were furious," supplemented Jim. "But, believe it or not, that's one thing the West has taught me—what you meant that day. The West is beautiful of course, in her own way. I can even see why her native sons go loony over her. But to one born and reared in New England, she—well, she lacks the finishing touches, somehow—the silver ribbons."

CHAPTER XXIX.

Charmian awoke next morning with that strange sensation of something gone wrong that comes after a bereavement, the pain of which has been lost for a while in the blessed oblivion that descends on us with sleep. It was a moment before she understood its meaning, and as the truth dawned on her there came with it the thought that Jim was home again, and her heart lightened. His presence would make things easier—divert her grandmother from too sad thoughts. Lying there in the room—in the very four-posted bed, indeed, where she was born, Charmian thought gratefully that Jim Bennett was a lighthouse, making the dark waters through which most of us must fight our way, at times, safer and brighter for those whose lives touched his.

She closed her eyes a moment, then, as a sunbeam struck across her face, tossed back the covers and going to a window looked down on sleepy Wickfield. Main Street had quite wakened, and only the Merrys' Gypsy was abroad, going about his business soberly but with a glance for Lizzy's Persian pussy that adorned a fence post. "His mind on higher things," smiled Charmian.

"Somewhere farther down the street a door slammed, and a boy whistled. A new day had begun."

"And after all," mused Charmian as she turned away, "what difference

## ACHES

There's scarcely an ache or pain that Aspirin will not relieve promptly. It can't remove the cause, but it will relieve the pain! Headaches, Backaches, Neuritis and neuralgia, Rheumatism, and rheumatism. Read proven directions for many important uses. Genuine Aspirin can't deprive the heart. Look for the Bayer cross:

"Now don't hurry back on my account," said Grandma, as the girl kissed her. "Seems to me you look kind of pale this morning. You'd better lallygag around and have a real good time while you're about it."

"She can't help having a good time if she lallygags with me," Jim boasted, grinning; but his face grew serious as they reached the sidewalk and he said: "Buck up, Charmian. You look like a ghost. I don't believe you ate your breakfast. I had a bit of trouble getting mine down, too—kept wondering how you were feeling. Don't cry, please, whatever else you do, or I'll be likely to blubber in sympathy and my reputation as a hard-boiled collector of interest will be ruined."

"I shan't cry," she promised; and then, after a silence, "It's a big comfort having you along, Jim. I wonder if you know—"

"Know what?" he urged after another pause.

She looked up, her eyes meeting his in a glance that caused his heart to thump so loud that he wondered if she could hear it; but all she said was: "Here we are at the bank. I wonder if my purchaser has arrived."

It took five minutes to get through the greetings of Jim's one-time fellow workers; but when at last they entered George K.'s sanctum, he was alone.

"On time," he said approvingly, with a glance at the clock, "and the deed ready for your signature. No need to delay because your man is—er—unavoidably detained. I heard from him this morning. He sent a check, and said he'd call on you when he got here, tomorrow, probably. Charmian, my dear, it breaks my heart to see you look so utterly done up. It's a blow, I know; but after all, it's the sense!"

"Hush up!" Jim interrupted, much to the surprise of the kindly banker. "I beg pardon, Uncle George," he added quickly, "but this poor sick is sick of being told that she's doing the right thing. She knows it's the right thing, but that doesn't make it easier. Is that the deed?" He lifted it from the desk, read for some moments, and then said: "Try all the rules of good business, Charmian, you ought to persevere this deed before you sign it; but the way you're feeling now I doubt if you'd understand a word, so I've done it for you. It seems to be perfectly O.K., as of course it would be if Uncle George had anything to do with it. Sign here, please."

He was pointing to a dotted line, while the banker watched him from under lids that appeared to be half closed. Charmian drew nearer, grasped the unfamiliar pen, signed her name hurriedly, and then looked up with such a brave attempt to smile that George K. was obliged to clear his throat.

"It doesn't look much like my writing," she commented, glancing down at the untidy signature. "My fingers seem to be all thumbs this morning. I—I—" Then a bit of her self-control gave way and she added:

## YOUNG WIFE STRENGTHENED

After Taking Lydia E. Pinkham's Vegetable Compound

Bancroft, Ontario—"When I first took Lydia E. Pinkham's Vegetable Compound I had been married about a year and my strength was leaving me on account of my condition. I was only 19 and it was my first child. My mother told me I needed something to steady my nerves and a girl friend told me to take the Vegetable Compound. I am so thankful I did because it strengthened my whole system and now I feel perfectly well and have a sweet little baby boy."—Mrs. J. B. STALKER, Bancroft, Ontario.

Desperately: "Oh, why didn't that man come? I wanted to meet him and get it over with, and—and go home. Why couldn't he have come?"

Despite his weight George K. arose with surprising swiftness. He put a comforting arm across her shoulders and said huskily: "Charmian, dear child, we didn't mean to torture you like this. You see—"

(To Be Continued.)

## National Air Tour

Two Trophies To Be Won in the 1930 Tour

Two trophies are at stake in the National Air Tour of 1930, and for each one of them a determined contest is forecast by Captain Ray Collins, manager of the tour.

The major trophy, offered first six years ago by Edsel B. Ford, to the plane displaying the greatest commercial reliability in the tour, might pass this year into the permanent possession of the Waco Aircraft Company which has already won it twice in succession.

An additional trophy, posted for this year's tour by the Great Lakes Aircraft Corporation, of Cleveland, Ohio, will be awarded to the plane powered with an engine of 510 cubic inch displacement or less, which makes the highest score under the system of scoring by the tour formula.

The major trophy carries with it a first prize of \$2,500, with \$9,500 divided among the succeeding nine that finish. No monetary prize is offered with the smaller trophy.

The Edsel B. Ford trophy is a magnificent example of the trophy designer's art, and it represents the highest victory attainable by the commercial plane in America. It may be competed for only by commercial planes entered by bona fide manufacturers, and if it be won by the same manufacturer three years in succession, it becomes his permanent possession. The holder may determine then whether it shall be competed for again in a similar contest.

Three successive winners of the Great Lakes trophy changes the permanent possession. It is possible of course for the same manufacturer to win both trophies, but the second trophy has been offered as a special award to the smaller, sport type planes, similar to that manufactured by its donors in Cleveland.

The fact that Waco can win the major trophy permanently this year, and the additional element of contest introduced among pilots of sport planes powered with 510 cubic inch engines, is likely to make this the most hotly contested tour yet staged. Some important changes in the tour formula by which the contestants will be scored, are also designed to put more of the aspect of competition on the tour.

Externally or Internally, It Is Good. Rubbing Dr. Thomas' Electric Oil over the pores and penetrates the tissue, touching the seat of the trouble and immediately affording relief. Administered internally, it will still the irritation in the throat which induces coughing and will relieve affections of the bronchial tubes and respiratory organs. Try it and be convinced.

## Advice Of King's Physician

Rest Often and Never Eat When Cold Says Lord Dawson, Of Penn

Never sit down to a meal if your hands or feet are cold. This is the admonition of Lord Dawson, of Penn. physician to King George, offered to a distinguished gathering at the sectional session on medicine in connection with the British Medical Association Convention, held in Winnipeg. Unpleasant, sometimes serious results may ensue, he mentioned.

"If a man comes home after a hard day's work, cold and tired and sits down and eats a good, square meal, he is going to have trouble," warned Lord Dawson. "Before eating he should toast his feet in front of the fire and warm his hands in a basin of water."

Eating when the extremities are cold, he said, often causes indigestion and nearly always induces constipation the following day.

Business men would be well advised, he said, to take a day or a half-day in bed once a week—read, perhaps, keeping warm; eating lightly. The man who guided England's King, from the shadow of threatened death, discontinued the talk of week-end exercise in a big way. Folks who play a round of golf Saturday and two on Sunday "to get in their exercise," would be better off to go to bed Saturday afternoon for a good nap, forgetting the worries of the week, and possibly playing a game of golf, Sunday.

Forty-five steamship companies now make regular calls at Singapore, Straits Settlement.

Inhale Minard's Liniment For Asthma.

## Too Much ACID

Many people, two hours after eating, suffer indigestion as they call it. It is usually excess acid. Correct it with an alkali. The best way, the quick, harmless and efficient way, is Phillips' Milk of Magnesia. It has remained for 50 years the standard with physicians. One spoonful in water neutralizes many times its volume in stomach acids, and at once. The symptoms disappear in five minutes.

You will never use crude methods when you know this better method. And you will never suffer from excess acid when you prove out this easy relief. Please do that—for your own sake—now.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

## A Peaceful Army Of Invasion

German Tourists Are Now Flocking To French Capital

No sooner had the French evacuated the Rhine land than an army of Germans invaded Paris, with this decided difference—the French were soldiers; the Germans were tourists. Germans were excluded from Paris, first by the war, then by the emnity between the two nations which continued after the war. Withdrawal of the French from the Rhine removed the last trace of war, and a host of Germans went on a peaceful mission to the French capital. They made welcome and the French government has offices in Berlin and other cities where all needed information is given. Germans travel through France in a very different spirit from those who began the journey 16 years ago and whose war made an appointment to eat dinner in Paris on a certain day, an appointment which he did not keep. They come as friends and are received as friends. France is exploiting her reputation as the show country of Europe, and is as ready to show it to Germans who come unarmed as to other people. But what commentary on human folly is the fact that 16 years have been needed to overcome the estrangement of two neighboring nations.—Portland Oregonian.

Wild Ducks Not Decreasing Number Is Quite Up To Average This Year

Wild ducks and geese appear to be quite up to the average numbers this year, according to the game branch of the Department of Labor, Railways and Industries. On the deeper bodies of water these birds are more numerous this year than ordinarily owing to the fact that most of the smaller sloughs have dried up.

In some quarters farmers reported damage to their crops from the feeding activities of wild ducks. A number of requests were received to permit shooting to prevent further damage. It is pointed out by the game branch that, although it is permissible to shoot to frighten the birds, the only source from which permission to kill game out of season can be obtained is from the Minister of the Interior at Ottawa. There is no case on record of this permission having been granted.

The open season for ducks and geese opens September 15 every year. There is no open season for prairie chickens and ruffed grouse this year. Hungarian partridges may be shot during the month of October. Badgers and foxes come this year under the list of game protected for the greater part of the year.

Worms in children's necks have. These pests attack the tender lining of the intestines and, if left to pursue their ravages undisturbed, will ultimately perforate the wall, because these worms are of the hook variety that cling to and feed upon the interior surfaces. Still's Worm Powders will not only exterminate these worms, of whatever variety, but will serve to repair the injury they have done.

Boas—"So you want this afternoon off, eh? Grandmother dear, I suppose?"

Officer Boy—"No, indeed. She has two tickets for the game."

London's public debt now is approximately \$729,000,000.

Four Doses Relieved Bad Attack of Cholera

Mr. W. J. Cooper, Maunabo, Alta., writes: "A year ago last spring I arrived in Canada with my family, and one of my boys, aged six, was suffering very much with cholera. When we arrived I had a few hours to wait, and I called one of the attendants at the station about it, and he asked me if I had ever tried Dr. Fowler's Extract of Wild Strawberry. I had never heard of it in England, so he told me I could get it in Winnipeg. I am pleased to say I had only to give the child four doses and he got well and was quite cheerful by the next morning."

## Little Helps For This Week

"For we walk by faith, not by sight."—2 Corinthians v. 7.

Thy God hath said 'tis good for thee To walk by faith, and not by sight: Take it on trust a little while; Soon shalt thou read the mystery right.

In the full sunshine of His smile.

—John Keble.

As the arm grows strong only by work, as the memory increases only when made to carry weights, as the eye can see only in light, so faith has a chance to develop only in darkness and trial. There is no room for faith in the daylight; anybody can trust then. Do not even the theists? But he who on the darkness of the tempest-tossed waters can trust Him who stilleth the storm—be he and he only, can claim to walk by faith.

—M. J. Savage.

## Interesting Statistics

Some Facts That People Are Not Generally Aware Of

Do you know that the world's annual income is \$167,500,000? The astonishing fact is revealed by the report of a German bank, which has been studying world statistics for six years. Other interesting points from this report are: The world is drinking more milk and more tea, more coffee than cocoa. We eat less bread, and fruit and vegetables are taking its place. We are smoking less tobacco, in spite of the large increase in women smokers. In England there are thirty-five people to every motor-car. In America one person in five is the proud possessor of a car. One hundred and seventy-three thousand tons of artificial silk are used annually for the manufacture of ladies' stockings. If the wealth of Great Britain were distributed equally among the population, every person would receive \$500.

Like a Grip At The Throat. For a disease that is not classed as fatal there is probably none which causes more distress, suffering than asthma. Sleep is impossible, the sufferer becomes exhausted and finally, through the attack passes, is left in increasing dread of its return. Dr. J. D. Kellogg's Asthma Remedy is a wonderful remedial agent. It immediately relieves the restricted air passages as thousands can testify. It is sold by dealers everywhere.

## Chinese Asking For Entry Of Families

Residents Of Canada Will Ask Premier To Grant Request

In an effort to secure modification of Dominion immigration regulations to permit entry of Chinese women and children into this country, 36,000 Chinese residents of Canada will shortly petition Premier R. B. Bennett to reconsider this request.

Dr. Tschy Heich, managing director of the Chinese Trade Bureau, of Canada and United States, will voice the request, it was learned. He arrived in Ottawa after conferring at Toronto with members of the National League and other Chinese bodies.

Minard's Liniment is a household friend.

Peat Moll From Manitoba

A Minneapolis firm is experimenting on the use of Manitoba peat mull in the manufacture of insulation. About 242,000 acres of this material have been surveyed in Manitoba.

## Quality Merchandise

### CHINTZ

Cooler days ahead will demand warmer bed covers. When ready to make up Comforters and Quilts, see these Remarkable Values. A full 36in. wide in fast colors, neat small patterns in shades of Rose, Tan, Grey & Blue.

SPECIAL VALUE, Per Yard ..... 25c

PER GARMENT ..... \$1.45

### Men's Woolltone Combinations

A Spring Needle Knit Garment that gives with every motion of the body, insuring you Comfort and Wear. Regular fall weight, full sizing, 34 to 42.

PER GARMENT ..... \$1.50

## J. C. McFarland & Co.

### Ducks Should Hear About This

SHOOTING SEASON WILL OPEN SEPT. 15 THIS YEAR CONTINUING TO DEC. 14.

A summary of the Migratory Birds Convention Act is given below. This is the law which is based upon the Treaty with the United States. Any enquiries concerning this law may be addressed to the Commissioner, National Parks of Canada, Department of the Interior, Ottawa.

#### Open Seasons

(Both dates inclusive.) Saskatchewan—Ducks, Geese and Coots, Sept. 15th-Dec. 31st; Wilson's or Jack-snipe, Sept. 15-Dec. 31.

Alberta, (North of the Clearwater and Athabasca Rivers)—Ducks, Geese and Coots, Sept. 1-Dec. 14; Wilson's or Jack-snipe, Sept. 15-Dec. 14; (South of the Clearwater and Athabasca Rivers), Ducks, Geese, and Coots, Sept. 15-Dec. 14; Wilson's or Jack-snipe, Sept. 15-Dec. 14.

#### Closed Seasons

There is a closed season in the Provinces of Saskatchewan and Alberta on Swans, Wood Duck, Elder Duck, Cranes, Curlew, Willet, Godwits, Upland Plover, Black-bellied and Golden Plover, Greater and Lesser Yellow-legs, Avocets, Dowitchers, Knots, Oyster-catchers, Phalaropes, Stilts, Surf-birds, Turnstones, and all the shorebirds not provided with an open season in above schedule.

There is a closed season throughout the year on the following non-game birds: Auk, Auklets, Bittern, Puffins, Gannets, Grebes, Guillemots, Gulls, Herons, Jaegers, Loons, Murrelets, Petrels, Puffins, Shearwaters and Terns; and there is a closed season throughout the year on the following insectivorous birds: Bobolinks, Catbirds, Chickadees, Cuckoos, Flickers, Flycatchers, Grosbeaks, Hummingbirds, Kinglets, Martins, Meadow larks, Nighthawks, or Bull-bats, Nut-

hatches, Orioles, Robins, Shrikes, Swallows, Swifts, Tanagers, Titmice, Thrushes, Vireos, Warblers, Waxwings, Whip-poor-wills, Woodpeckers, and Wrens, and all other perching birds which feed entirely or chiefly on insects.

No person shall kill, hunt, capture, injure, take or molest migratory birds during the closed season. Sa'e of these birds is forbidden.

The killing, capturing, taking, injuring or molesting of migratory insectivorous and migratory non-game birds is prohibited. The possession of migratory game birds killed during the open season is allowed in Alberta until March 31, following the open season, and in Saskatchewan until the last day of February following the open season.

#### Daily Bag Limits

Saskatchewan: Ducks and Geese—30 of all kinds in one day, but not exceeding ten geese, and 150 of all kinds in a season, but not in excess of 30 geese; Coots—25 and not more than 150 in a season; Wilson's snipe—15, and not more than 150 in a season.

Alberta: Ducks—30 in one day and no more than 200 of all kinds in a season; Geese—15; Coots—25; Wilson's snipe—25.

The use of automatic (auto loading) swivel or machine guns, or battery, or any gun larger than No. 10 gauge is prohibited, and the use of any aeroplane, powerboat, sail boat or night light, and shooting from any horse drawn or motor vehicle is forbidden.

The shooting of migratory game birds earlier than one hour before sunrise or later than one hour after sunset is prohibited.

#### Penalty

Every person who violates any provision of this Act or any Regulation shall, for each offence, be liable upon summary conviction to a fine of not more than three hundred dollars and not less than ten dollars, or to imprisonment for a term not exceeding six months or to both fine and imprisonment.

### LIBERAL WINS IN BEAVER RIVER BY MAJORITY OF ONE

Second Re-count Gives Capt. Dakin Victory Over Delisle, U.F.A. Man Decision Is Final

By the narrowest possible margin of one vote, Capt. H. H. Dakin, Liberal candidate in the Beaver River provincial constituency wins the seat, according to a decision handed down in the supreme court on Saturday by Chief Justice W. C. Simmons of the trial division.

The total vote polled and as counted by His Lordship was as follows: Dakin 1039; J. Amos Delisle, United Farmers of Alberta candidate and sitting member at dissolution, 1038.

#### No Appeal

With His Lordship's decision on Saturday the issue is finally settled as there is no further appeal permissible.

The decision is in confirmation of the judgment handed down by His Honor Judge Taylor of the district court who in his recount declared Capt. Dakin elected by four votes, or a total of 1,036 to 1,032.

With this seat finally going to the Liberals the standing of the various parties in the recently-elected seventh legislature will be as follows:

U.F.A., 39; Liberals, 11; Conservatives, 6; Labor, 4; Independents, 3; or a total of 63.

Thus in the new house the U.F.A. still will have a majority over all of 15 as against a majority over all of 26 in the last house.

It pays to read advertising messages in this paper, week by week, they contain store news, and information of much value—offerings of bargain buys which mean money saved to the careful shopper! Incidentally, it is mighty poor economy to be without the local paper—its advertising news alone will, in the course of a year, more than repay in dollars and cents the price of the annual subscription.

### Main Street

Mr. J. W. Wyatt of Edmonton was in Irma Wednesday.

Mrs. Roy Whyte and daughter returned Tuesday after spending a month with her parents at Vancouver.

Mrs. L. Long who has been living at Peterboro for some time has returned to Irma.

A daughter arrived at the home of Mr. and Mrs. Earl Prior, Tuesday, September 9th.

Mrs. M. E. Curfman left Tuesday for Edmonton where she will make her home for the winter.

Dr. and Mrs. Greenberg returned the first of the week after a very pleasant trip to Winnipeg and Central States points.

Several new threshing outfits have been unloaded at Irma the past week and are being started on the bumper crops.

Saturday night after midnight a car drove to Jim Elliott's farm and took three balls of twine, a crowbar and all of his tools which he had been using on his binder near his gate. The parties were watched and if they return the stolen articles no questions will be asked.

Mr. D. Chalmers, apiary inspector for the department of agriculture, has been here the past week inspecting the bees in the Irma district. Mr. Chalmers found all of the bees in the Irma district entirely free from disease and found an excellent crop of honey had been secured. The honey in the Irma district is all secured from sweet clover and cannot be surpassed for flavor and color. A ready market is found for it wherever it is introduced.

Threshing is progressing in all parts of the Irma district and the yield and grade is all that has been expected and in many cases better than ever produced before. Mr. Congdon has a field of Garnet wheat that averaged 52 bushels per acre, and graded No. 2. Mr. Sam Bugarisky has the honor of shipping the first car of 1930 wheat to Fort William. This left Irma last Saturday, September 6th. Mr. Bugarisky is a newcomer from Oregon who purchased a section of C.P.R. land last summer which lies about eight miles northwest of Irma. He had most of it broken and sowed 500 acres to wheat and one hundred and twenty to oats. The wheat is averaging 30 bushels and oats are looking good. Mr. Bugarisky is highly pleased with his location and thinks the Irma district is just a little better than any farming district he has been in.

### WANT ADS

FOR SALE—One set of Books of Knowledge. Practically new at half price. —apply Nina McGregor, Irma, Alberta. 3tp
